

Mid Semester Summary
To be completed collaboratively between the student and faculty.

STRENGTHS (at least three):

Professional
Safe competent care
Positive to feedback
Avid learner
Provides sound rationale for treatments

AREAS FOR CONTINUED GROWTH (at least three):

Continue to participate comprehensively during interprofessional rounds
As all students read to embellish knowledge
Continue with advanced acute clinical skills

End of Semester Summary
To be completed collaboratively between the student and faculty.

STRENGTHS (at least three):

Displays eagerness in clinical and continuously seeks learning opportunities. Therefore learned immensely.

Works hard in clinical

Readily assists staff, colleagues without hesitation

Acquired many skills PICC line observation, flush, measurement, IV, IV medications, SC, IV flushes, Heparin drip sliding scale and calculations, narcotics, catheter, dressings, ceiling lifts, drains, head to toe assessment, lab and diagnostics result review, participation in multidisciplinary rounds.

Provided patient teaching (smoking, catheter indication) and peer teaching (narcotic withdrawal tool)

Attended cardiology rounds presented by MD

Wonderful/Excellent work!

A pleasure to have as my student! Wishing you success in all your future endeavours!

AREAS FOR CONTINUED GROWTH (at least three):

To challenge yourself, continue to seek learning opportunities as you are doing now to reach your top best.

Continue to find innovative ways to make a difference in patient care as you already are.

To challenge yourself, although you have mental health background you are highly knowledgeable, avid learner, competent to work in med surg unit or CTU, a leadership position in your facility to pass on your knowledge to others in the future.

Create a work portfolio to showcase your clinical skills and written work.
